

Priya Sharma

SENIOR DATA & MACHINE LEARNING ENGINEER

Email: priya.sharma@example.com Phone: (555) 412-0092 Location: New York, NY GitHub: github.com/psharma-data

Data Engineer specializing in large-scale ETL pipelines, data warehousing, and infrastructure for Machine Learning models. Proficient in Python, Spark, Snowflake, and ML deployment frameworks.

SKILLS & TOOLS

Languages: Python, SQL, Scala, Java

Big Data & Processing: Apache Spark, PySpark, Airflow, Kafka, dbt

Databases & Warehousing: Snowflake, Databricks, BigQuery, PostgreSQL

MLOps: MLflow, Feast Feature Store, Docker, BentoML

PROFESSIONAL EXPERIENCE

Staff Data Engineer — OmniData Insights

2022 – Present

- Built real-time streaming data pipelines using Spark Streaming and Airflow to process 5TB+ daily raw logs into Snowflake.
- Architected Feature Store using Feast, decreasing model deployment time for ML teams from 4 weeks to 2 days.
- Implemented data quality testing using Great Expectations, reducing data pipeline failure rates by 70%.

Data Engineer — FinTech Analytics

2019 – 2022

- Designed dimensional modeling schemas in BigQuery supporting BI dashboards for 200+ internal stakeholders.
- Refactored legacy SQL ETL scripts into modular dbt models, drastically improving pipeline maintainability.

CERTIFICATIONS

Databricks Certified Data Engineer Professional — Databricks

Issued Jan 2024

SnowPro Core Certified Architect — Snowflake

Issued Jun 2022

EDUCATION

M.S. in Data Science — Columbia University

2017 – 2019

B.S. in Computer Science — NYU

2013 – 2017
